Mar

## AND EVENTS

Pvt.

4th runner-up in pan india coding contest organised by Kronos India

Ltd. This contest was hosted on techgig in which 7000 coders have participated all over the India.

Google Developers Group devfest hackathon 2017 finalist

Sep 2017

Was among the top 10 team in the hackathon organised by Google Developer Group Bhubaneswar. In the 10 hours long hackathon we made a Review analysis of products from e-commerce websites such as amazon, Flipkart, etc. In the project we have trained the machine learning model to do the sentiment analysis of reviews by verified users.[\[Github\]](#)

## PROJECTS

### TWITTER SENTIMENT ANALYSIS

In this project I have written a script for the live sentiment analysis of Twitter. It will draw the graph of sentiments of twitter in real time.

Tech Stack: Python Scikit-learn, nltk, matplotlib, tweepy

### HIBISCUT

In this project I have written a script by which it will automatically sends the official notices to the students via sms from the online notice board of

IIIT Bhubaneswar.[\[Github\]](#)

Tech Stack: Python Selenium, Requests, PhantomJS, urllib2

### Employee Tracking System

In this team project we have made a real time Employee tracking system. In this we made an android app which will give the real time location of an

Employee.[\[Github\]](#)

Tech Stack: Javascript, php, Apache Cordova
